

Architectural Aluminum AUTOMATIC COATING LIMITED

Your Powder Coating / Painting Job Shop

The aluminum balcony panels on this building were stripped of their original coating and recoated in our facility over 2 years ago, they show zero signs of corrosion

This building is subjected to north, south, east & west exposure. Standing up perfect through 2 harsh winters.

The coating shows no damage or degradation even at ground level where weekly greenskeeping or snow removal takes place.

Over two years in service the finish remains clean, maintenance free with a gloss retention of 96%

This property management firm found recoating existing panels cost effective and are considering the same on future upgrades.

Coating exterior panels is only one area of ACL's Coating capabilities, we offer the following equipment to serve all your needs and specifications.

- * Powder coating Line #1 with 5 stage wash 4'x 8' 12' opening, 2500 lb capacity.
