

# Pipe, Pumps & Valves

## ***AUTOMATIC COATING LIMITED***

Your Powder Coating / Painting Job Shop

***Utilities find that ACL's powder coating offers infrastructure payback within a few years.***

*This fire hydrant may fade slightly over the next 10 years, but will not require an on site repaint giving a good payback within the course of three years.*

*Where liquid paints fail, powder coating performs. This water pump venture will last indefinitely. ACL can mask required surfaces from coating, note the bronze pickup ring & flange.*

*60 inch diameter water pipe. Internally powder coated pipes and pumps greatly improves efficiencies reducing power costs. Large and small diameter pipes coated internally and externally will last indefinitely.*

*This pumping station has a severe cavitation problem, the powder coating has outlasted the liquid 3 to 1 and still looks 100%. This will extend the life of the wear areas of the pump for many maintenance free years.*

***Pumps, Pipes, Valves and fittings are only one area of ACL's coating capabilities, we have the following high and low volume equipment to serve all your powder coating needs and specifications.***

- \* 70,000 sq' modern facility
- \* Electrostatic Powder coating Line #1 with 5 stage wash 4'x 8' 12' opening, 2500 lb capacity.
- \* Electrostatic Powder coating Line #2 with 240' long 5 stage stainless steel washer 5' x 7' x 35' part opening, 4000 lbs capacity.
- \* Powder coating Line #3 with 9'x 9'x 24'x 10 ton multi oven batch system

- \* Powder coating Line #4 with Multi-Coat System
- \* State of the art spray booth & powder recovery system
- \* Automated Fluid bed dip up to 24' long (mil spec)
- \* Metal stripping burnoff 5'x 9'x 12'
- \* Extrusion cut to length service
- \* 6 automated gritblasting wheelabrators of all sizes
- \* Indoor loading docks with 10 ton overhead crane
