

Shop Applied Coating Services

- Applying FBE (single or multi coat) to the interior and exterior of pipes and fittings
- Internal and external pipe coating
- Liquid coatings plural, 100% solids or solvent borne to the interior and exterior of pipes and fittings
- Can handle pipes up to 16 feet in diameter 80 feet in length
- ACL is certified by all major coating suppliers
- Our Quality Assurance lab is fully equipped to do all required testing by qualified technicians
- 30 years experience applying F.B.E and Liquid coatings to the interior and exterior of pipe, tanks and all types of fabrication
- 70,000 sq. ft modern facility
- Certified coater for Enbridge, TransCanada Pipeline, Spectra Energy

www.automaticcoating.com

- The most technologically advanced powder and liquid coating facility in North America
- Approved and certified for pipe coating, tank lining architectural aluminum, fluid bed and electrostatic applications
- 75-ton crane capacity
- Extensive coating testing lab Mobile blast and coating services
- Multiple wheelabrators and airblast rooms and chemical pre-treatment
- U.S. Military approved
- ACL has a proven track record utilizing a proprietary application system for coating pumps of all sizes up to 35 tons withstanding the harshest cavitations.
- Plural component 100% solids liquid epoxies
- Onsite engineering/CAD/Solidworks
- Thermal Arc Spray Metalizing
- Robotic powder applicators ensuring repeatable quality

Precision Pipe Coating Services

Automatic Coating has developed an automated shop applied pipe coating system. This system has enabled Automatic Coating to be more cost effective (particularly in the areas of transportation savings) versus sending pipe back to the U.S. production mills for corrosion coatings. This innovative technology has allowed Automatic Coating Limited to enter the market and compete on pipe coating offerings within the Canadian oil and gas industry. Automatic Coating Ltd. is an approved coater for Enbridge, Trans Canada Pipe Line and Spectra Energy
