

INTRODUCING ACL'S NEW FLEXLINE

For over 48 years ACL has provided expert and versatile finishes for a diverse range of industries.

The changes we have made in the plant have set the foundation for the next ten years and allow us to rapidly adapt to our customers ever changing needs

ACL'S NEW FLEX LINE

Versatile

Increased Capacity

Shorter Lead Times

Larger Parts

Now capable of coating on one line mixed metal orders,
Steel and Aluminum using high performance pre-treatments

Change over from Aluminum to Steel in minutes

Powder primer and powder top coat in a single line pass

Infrared and convection oven curing process

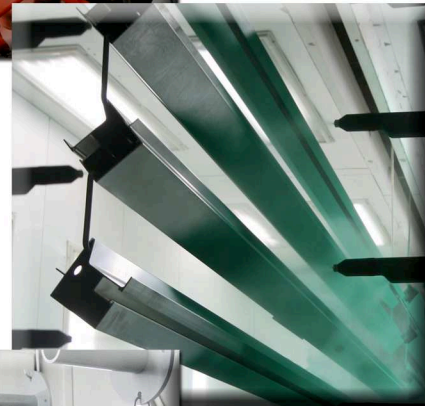

Double oven set for immediate change overs from low
to high mil coating ranges

Multi position 24 gun automatic coating application

Capable of running parts up to 32 feet in length

7 Stage zinc phosphate pretreat which results in longer
outdoor durability VS typical
3 stage iron phosphate

Dedicated chrome free aluminum pretreatment
for high performance architectural coating

ISO 9001

AS9100 rev B aerospace approved coater
